

# Vehicle Fuel | Telemetry Automation

Post metered data for fuel and mileage from your fuel and AVL solutions to your asset management solution.

**1** The Automation performs a **Scheduled Query** against the **AVL** or **Fuel system** against fleet vehicle information.

**2** Vehicle statistics (distance / time / fuel use per trip) and fuel loaded data are mapped to the **Common Message Model**.

**3** The message is processed to allocate vehicle statistics to each work order, or to load fuel as material associated to each vehicle.
